PROFILE SUMMARY

With a background in industrial engineering and more than 4 years of sales experience, I'm eager to work in the field of product design. As an industrial engineer, I gained knowledge about creating products, and as a salesperson in the software sector, I had many close relationships with customers. In order to accomplish my goal, I enrolled in a UX Design with Frontend competence course in Chas Academy and began learning about it. I'm so excited about the new techniques and tools I've discovered and I like to apply them in real life products.
